2. My name is (name of interviewer), and I am a/an (student, volunteer, staff member) at (name of institution/facility). I am inviting you to participate in a research study. Involvement in the study is voluntary, so you may choose to participate or not. I am going to explain the study to you. Please feel free to ask any questions that you may have about the research; I will be happy to explain anything in greater detail. I am interested in learning more about your family's resources and needs. You will be asked to answer survey questions that include education, employment, housing, healthcare, and other basic needs. This will take approximately 30 - 45 minutes of your time. All information will be kept anonymous. This means that your name will not appear anywhere and no one except me will know about your specific answers. The benefit of this research is that you will be helping the East Texas Human Needs Network to better understand our community needs, the resources available, and the services that are still needed. This information will help us to work together to address services that are needed the most. There are no risks to you for participating in this study, and no penalty for not participating. If you do not wish to continue, you have the right to stop, at any time. Before we begin, I want to make sure that you understand the information I have told you about this project and your rights. Please tell me in your own words what you understand about this project and your rights as a participant. (if they are unsure or unclear about any elements of information, tell them again, and ask again that they tell you what they understand.) Now that you understand the study, are you willing to help me with this survey?
